

Relay S-1PH from 30A to 40A Power Controller

General Description

- Relay S has been specifically designed to save space and labour
- These simple units can be connected with Relay PC to manage multizone system this minimize your energy cost by controlling synchronization and power limit on each zone
- Integrated fuse + fuse holder is necessary to have a complete power control zone including current transformer and optional circuit board
- Flat Cable Wiring System (option) to connect in plug in mode many Relay S when HB alarm or analogue input are used
- Input signal: SSR, Analogue as an option
- Zero Crossing, Burst Firing available at 4, 8 or 16 Cycles at 50% of Power demand
- Electronic fully isolated from power with constant current drain on input.
- Heater Break alarm option to diagnose partial or total load failure and Thyristor Short circuit
- Fuse and Fuse holder available as an option
- Current transformer integrated (with Heater Break option)
- Special design for Heat sink with very high dissipation value
- CE, cUL
- DIN RAIL side by side mounting
- IP20 Protection

Technical Specification

Voltage power supply	24V minimum up to 480V, 600V On request		
Voltage frequency	50 or 60 Hz no setting needed from 47 to 70 Hz		
Nominal current	30A, 35A, 40A		
Input signal	SSR for Relay S, No Fuse,	5:30Vdc	9mA Max (On \geq 5Vdc Off \leq 4Vdc);
	SSR for Relay S, Fuse + Fuse Holder	7:30Vdc	9mA Max (On \geq 7Vdc Off \leq 6Vdc);
	SSR for Relay S, Fuse + Fuse Holder, + HB	4:30Vdc	5mA Max (On \geq 4Vdc Off \leq 1Vdc);
	Voltage input	0:10Vdc	impedance 15 K ohm;
	Current input	0:20/4:20mA	impedance 100 Ohm;
Firing	Zero Crossing, Burst Firing with analogue input signal only		
Auxiliary voltage supply	12:24V dc/ac (max 70 mA) required only with HB Alarm or Analogue Input Option		
Heater Bbreak alarm	Microprocessor based with automatic setting Digital Input, Relay Output 0.5A at 110V		
Mounting	DIN RAIL or panel mounting		
Operating temperature	40 °C without derating. Over this temperature see below derating curve		
Storage temperature	-25 °C to 70 °C Max		
Altitude	Over 1000 m of altitude reduce the nominal current of 2% for each 100m		
Humidity	From 5 to 95% without condense and ice		

Option's features and special details

Heater Break Alarm (HB)

ON FRONT CABINET

FEW SECOND TO SET AND CALIBRATE THE UNITS

- Microprocessor based circuit
- Capacity to diagnose the failure of one Resistance over five in parallel
- Load failure alarm with LED indication on front unit
- Thyristor short circuit alarm with LED indication on front unit
- Alarm output with free voltage relay contact
- Alarm reset function and possibility to auto reset if the alarm disappear
- Built in Current transformer when heater break option has been selected
- Self Setting via external command or push button on front unit
- Common setting command can be given to many units and in a matter of second, the tuning is done, also by a non expert operator

How to add power load management and features to your simple units

Use Relay-PC and you can add these Features

- Communication with different field bus
- Reading of current Voltage and Power
- Instantaneous power very close to average value, no pick power
- Power factor close to one no harmonics
- Prevents increase in energy supply tariffs imposed by your electricity supplier

APPLICATION WITH 8, 16 OR 24 SINGLE PHASE LOADS

WITHOUT POWER CONTROL OPTIMISATION

Synchronization

On all controlled zones, Relay-PC Synchronization is automatic resulting in superior performance:

- Total current is equal to a sinusoidal wave form.
- Power factor > 0,9.
- Instantaneous current close to average value.
- Cancellation of harmonics.
- Flickering effect removed.

WITH POWER CONTROL OPTIMISATION

Smart power limitation

- Smart power limitation works together with synchronization. If this function is enabled, Relay-PC makes a live calculation of power at each period and generates the output values for the next period. If the calculated power is below the power limit value, the previous values remain with each channel using full power.
- If the power is above the power limit value, the setpoint of each channel is reduced proportionally to restrict power overshoot. This function significantly reduces disturbances on the main network compared to a full power system, preventing any increase in energy tariffs imposed by the electricity supplier.
- This function can be activated/deactivated and the limit value changed at any time.

Ordering Code Relay-PC

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Relay-PC	R	P	C	-	-	-	-	-	0	0	0	0	0	0	0	0

4,5 - Channels	
Description code	Numeric code
8 Channels	08
16 Channels	16
24 Channels	24

6 - Current Sensor	
Description code	Numeric code
N. 1 CS 200 Amps	1
N. 2 CS 200 Amps	2
N. 3 CS 200 Amps	3
N. 1 CS 400 Amps	4
N. 2 CS 400 Amps	5
N. 3 CS 400 Amps	6
N. 1 CS 600 Amps	7
N. 2 CS 600 Amps	8
N. 3 CS 600 Amps	9

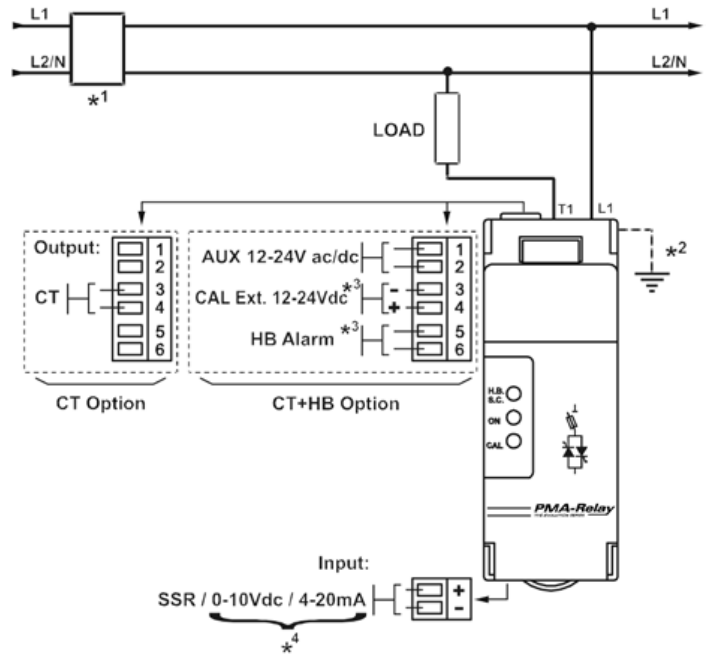

7 - Communication	
Description code	Numeric code
Ethernet	1
ModBus Slave	2
ModBus Master	3
Profibus	4
Profinet	5
CANopen	6
EtherCAT	7

8 - Transformer	
Description code	Numeric code
Transformer 24V	1

Applications

- Chiller applications
- Autoclaves
- Thermoforming
- Dryers
- Chemical
- Infrared lamp
- Furnaces
- Extrusion line
- Climatic chambers
- Pharmaceutical

Wiring connection Relay S 1PH from 30 to 40A

Notes

1. - A suitable device must ensure that the unit can be electrically isolated from the supply, this allows the qualified people to work in safety.
 - The user installation must be protecting by electromagnetic circuit breaker or by fuse isolator. The semiconductor fuse are classified for UL as supplementary protection for semiconductor.
2. The heat-sink must be connected to the earth.
3. Only for the HB option
4. Only for the Analogue Input option
5. Use the extra-rapid fuse with low I2t.

Dimensions and fixing holes

SR3 W 36mm. - H 121 mm. - D 125 mm. - kg. 0.44
 Relay S, No fuse 30A ÷ 40A

SR6 W 36mm. - H 121 mm. - D 185 mm. - kg. 0.61
 Relay S, with Fuse Holder 30A ÷ 40A

Relay S 30A ÷ 40A

Relay S 30A ÷ 40A

Output Features (power device)

Nominal current in continuous service:	30A, 35A, 40Aw
Max peak current (10ms)	400A for unit type 030 600A for unit type 035 800A for unit type 040
Voltage range:	24+600V
Repetitive peak reverse voltage:	1200V (480V), 1600V (600V)
Latching current:	250mA
Leakage current:	15mA eff
I^2t value $t_p=10\text{msec}$:	780A ² /S for unit type 030 1750A ² /S for unit type 035 3110A ² /S for unit type 040
Frequency range:	47+70Hz
Power loss ($I=I_{nom}$):	38W for unit type 030 44W for unit type 035 50W for unit type 040
Isolation Voltage:	2500Vac

(1) Load voltage must be included in Selected Voltage Auxiliary Range for units > 210A

(2) With analogue input (0:10Vdc, 4:20mA) it is necessary to have the fuse (1 phase also the fuse holder on units =< 40 A)

(3) On at 50% power demand; Available only with analogue input

(4) Available up to 40A. With flat wiring it is necessary to use TU-RS1 (2;3) terminal unit
